---

## Projects

### Jungle Safari Booking System/ Website

FEB 2017 - PRESENT

[https://github.com/abhi98khandelwal/Jungle\\_Safari](https://github.com/abhi98khandelwal/Jungle_Safari)

This site was developed as part of Technovate Fest. The backend and database using *django* and *SQLite* respectively is managed by me. The site is on process to be granted as the **official site** by CG Govt.

### Train Delay Prediction System/ WebApp

MAR 2017 - APR 2017

<https://github.com/abhi98khandelwal/HINT>

It was developed during the Hack In the North(HINT 2017) hackathon- the largest hackathon organized by students in India. This app would predict how much a train would be delayed on a particular station by using previous 20 years data. Data handling and analysis was done by me.

### Leave Management System/ Website

DEC 2016

<https://github.com/abhi98khandelwal/FacultyLeaveManagement>

This project was awarded as 3rd best website in NIT, Raipur Techfest. Developed, backend on *django* and database managed in *SQLite*. Being a Leave Manage site, It sends an email to respective authorities to approve the leaves.

### Marksheet Generator / Command Line Program

JAN 2016

This was part of the Higher Secondary School project. The program displays the top-10, Marker Cup eligible students of the class. Database is stored in normal txt file.

---

## Education

---
